

DAX Functions in Power BI Desktop

- ❖ DAX functions can **supercharge your analytics game**. Every DAX function applies a specific operation to the values in an argument. In a DAX formula, you can specify several arguments.

Power BI

**Aggregation
functions**

**Date & Time
functions**

Functions**

Naveen Billa

- These functions perform calculations on columns or expressions to summarize data.

Aggregation Functions

SUM

COUNT

AVERAGE

MIN

MAX

PRODUCT

SUMX

COUNTA

COUNTROWS

DISTINCTCOUNT

- These functions help you create calculations based on dates and time.

Date & Time Functions

TODAY

YEAR

QUARTER

DATE

DATEDIFF

EOMONTH

UTCNOW

WEEKDAY

DATEDIFF

CALENDARAUTO

Naveen Billa

- These functions allow you to filter and manipulate tables or columns based on specific conditions.

Filter Functions

FILTER

ALL

ALLSELECTED

ALLEXCEPT

SELECTEDVALUE

KEEPFILTERS

CALCULATE

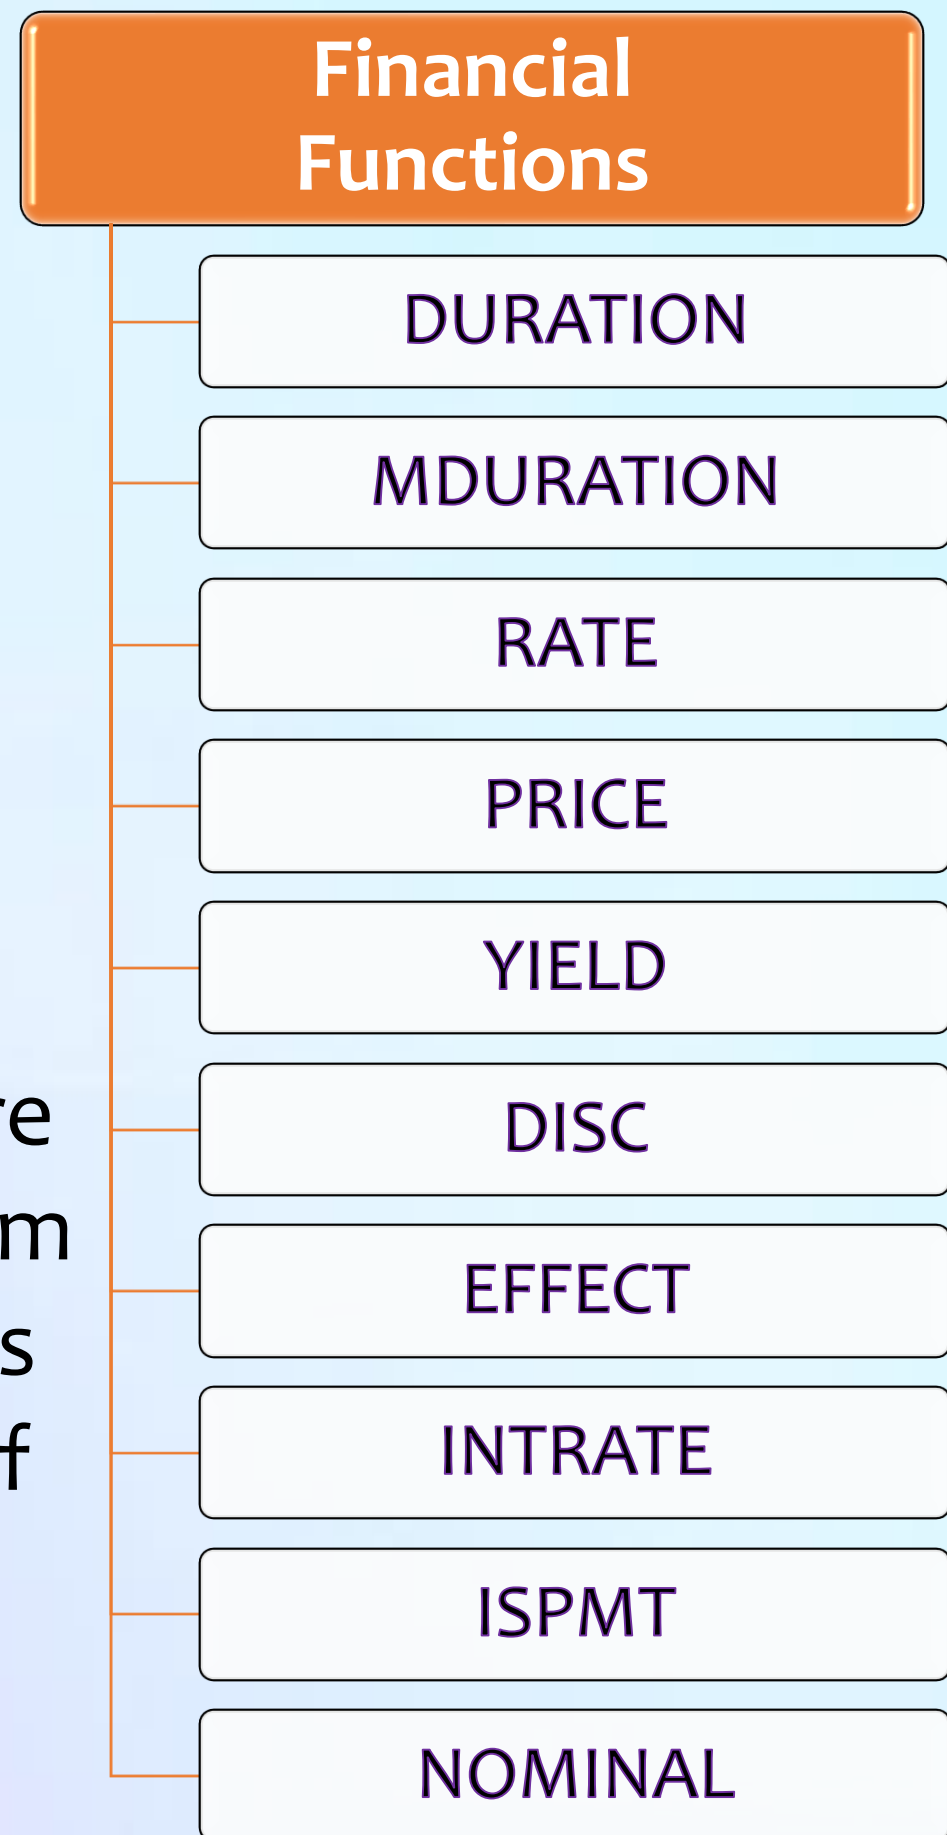

INDEX

LOOKUPVALUE

RANK

- Financial functions in DAX are used in formulas that perform financial calculations, such as net present value and rate of return.

- These functions provide information about data and calculations.

Information Functions

ISBLANK

CONTAINS

ISFILTERED

ISONORAFTER

HASONEVALUE

USERPRINCIPALNAME

USERNAME

ISERROR

ISTEXT

HASONEFILTER

Naveen Billa

- Logical functions act upon an expression to return information about the values or sets in the expression.

Logical Functions

IF

SWITCH

OR

AND

NOT

IFERROR

TRUE

FALSE

COALESCE

IF.EAGER

- Math and Trig DAX functions are used for performing a wide range of mathematical and trigonometric calculations.

Math & Trig Functions

ABS

ROUND

CEILING

DIVIDE

CURRENCY

FLOOR

SQRT

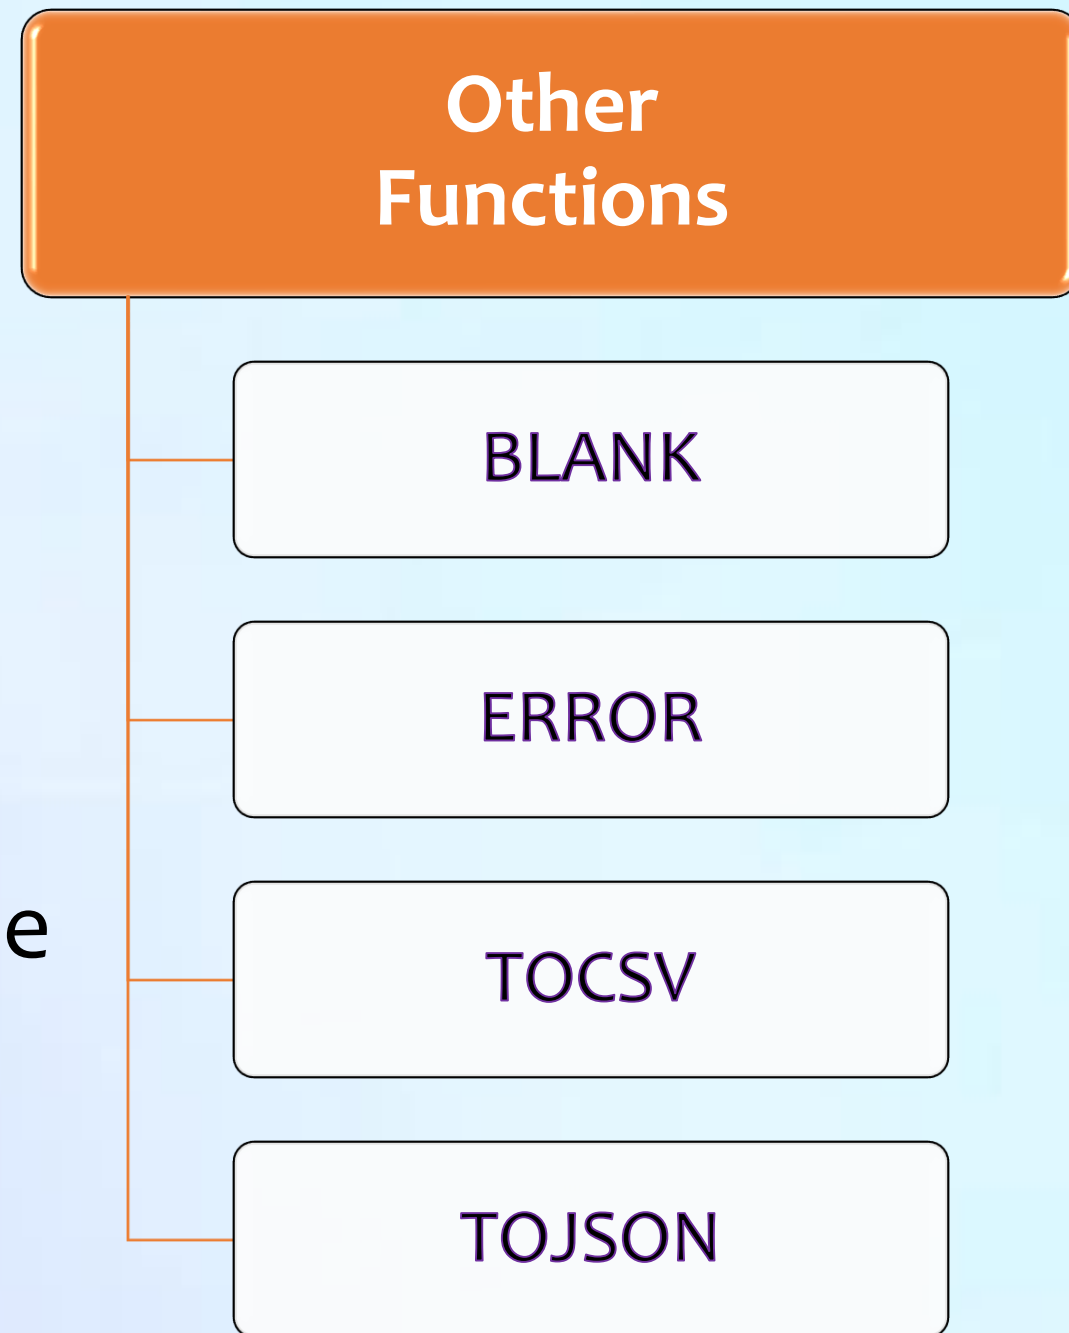

POWER

CONVERT

DEGREES

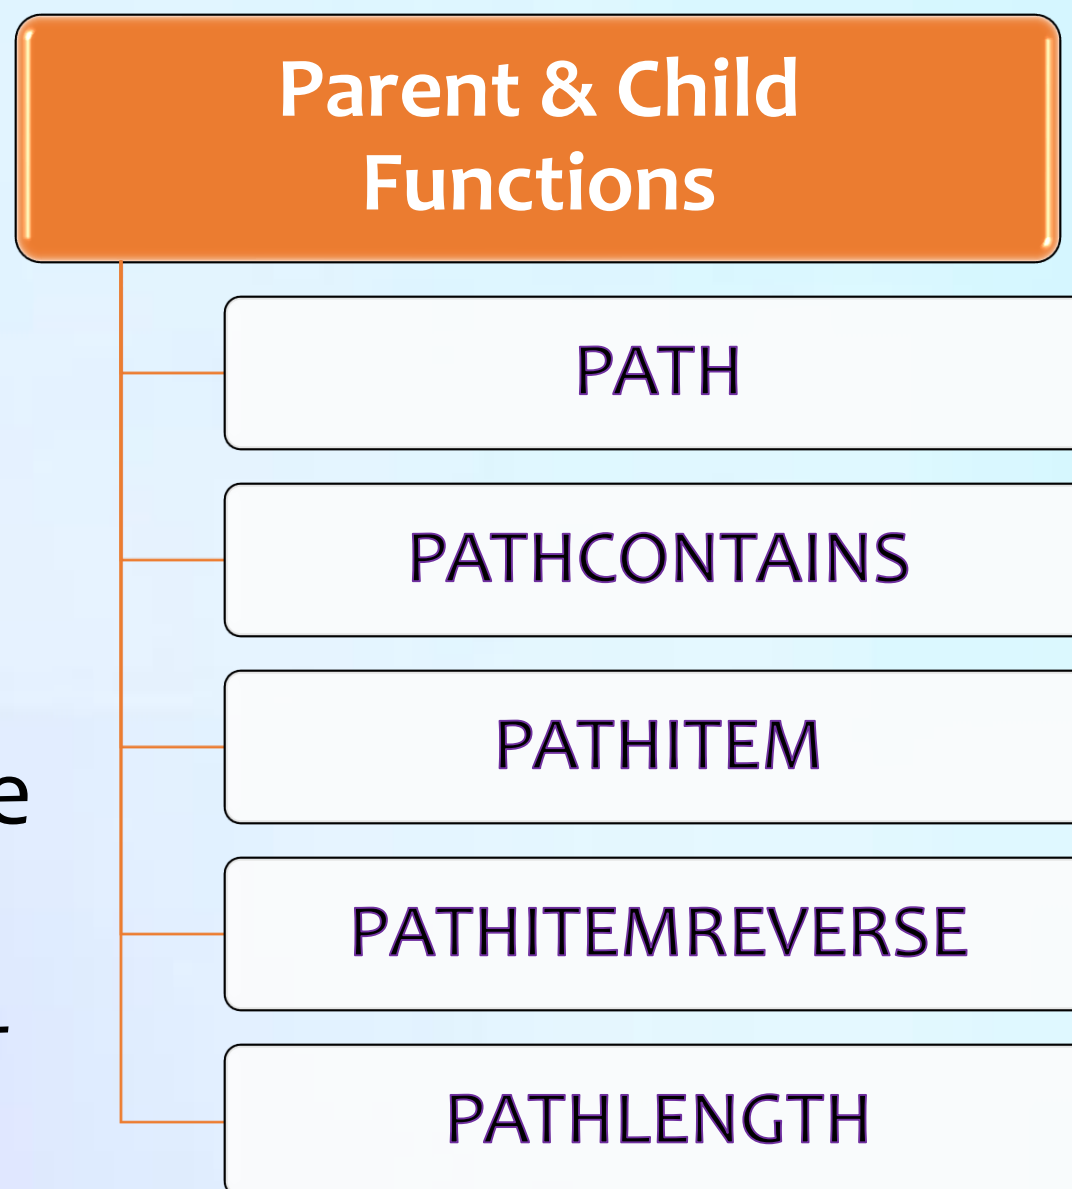

- These functions perform unique actions that cannot be defined by any of the categories.

- Parent and Child functions are used in DAX to navigate and work with hierarchical data structures like parent-child hierarchies.

- Functions in this category are for managing and utilizing relationships between tables.

Relationship Functions

CROSSFILTER

RELATED

RELATEDTABLE

USERELATIONSHIP

Naveen Billa

- These functions help you to calculate values related to statistical distributions and probability, such as standard deviation and number of permutations.

Statistical Functions

RANKX

STDEV.P

VAR.S

NORM.DIST

COMBIN

MEDIAN

GEOMEAN

CONFIDENCE.T

EXPON.DIST

LINEST

Naveen Billa

- These functions create, manipulate, or summarize tables.

Table Manipulation Functions

SUMMARIZE

ADDCOLUMNS

CROSSJOIN

VALUES

TOPN

UNION

TREATAS

EXCEPT

GROUPBY

INTERSECT

Naveen Billa

- These functions work with text data, such as manipulating strings.

Text Functions

FORMAT

CONCATENATEX

LEFT

SEARCH

FIND

EXACT

REPLACE

SUBSTITUTE

TRIM

UNICHAR

Naveen Billa

- These functions are used for analyzing and comparing data over time periods.

Time Intelligence Functions

TOTALYTD

DATEADD

SAMEPERIODLASTYEAR

PARALLELPERIOD

PREVIOUSYEAR

DATEMTD

DATESINPERIOD

LASTDATE

STARTOFMONTH

ENDOFYEAR

Naveen Billa

- DAX is continuously being improved with new functions and functionality to support new features.

New DAX Functions

NETWORKDAYS
